

## Recycling FLOWRx Patient Bags

The patient bags used with the bagging station on FLOWRx Hub are Low Density Polyethylene (LDPE) and include 30% recycled content.

They are 100% recyclable. However, we are aware that there is no national standard set for the way local authorities recycle. As part of our commitment to sustainability and the environment, we want to provide guidance on how patients can best recycle the bags.

The below website links can be used to determine which local authorities will accept plastic bags as part of their kerbside recycling collections or at their local recycling centres:

[Plastic bags and wrapping | Recycle Now](#) or [www.recyclenow.com/recycle-an-item/plastic-bags-and-wrapping](http://www.recyclenow.com/recycle-an-item/plastic-bags-and-wrapping)

It's also worth remembering that the majority of supermarkets now provide a plastic bag recycling service.
